COURSES

🏆 **Programming-hero**
Complete full stack web development Course by Jhankar Mahbub

CAREER OBJECTIVE

To work in the IT sector of different local or multinational software companies of Bangladesh as Front End Developer and grow rapidly with latest technology and increasing responsibilities.

PROJECTS

Car Shire

🔗 **Website | </> Client-side-code | </> Server-side-code**

- Features: Car repairing website. Users can order services and check their previous order history with status(pending, ongoing or done). This website has a functional admin panel with restricted access(only admin can access) section where admin can 1.add services,2.delete any existing services, 3.update the state of customers order.
- Technology Used: HTML, CSS, Bootstrap, React, React-Router, React-Hook-Form, Node.js, Express.js, Mongodb, Firebase, Heroku

Book Bay

🔗 **Website | </> Client-side-code | </> Server-side-code**

- Features: An online book store website. Users can order books and check their previous order history. This website has a functional admin panel section where admin can add new book for the store and also can delete any existing book.
- Technology Used: HTML, CSS, Bootstrap, Material-UI, React, React-Router, React-Hook-Form, Node.js, Express.js, Mongodb, Firebase, Heroku

Covid-19 Tracker

🔗 **Website | </> Code**

- Features: Worldwide and country wise daily and total coronavirus cases, recovered, deaths showing with heat map and chart. By selecting any country, the map will automatically zoom to that country with required information.
- Technology Used: HTML, CSS, Material-UI, React, Chart.js

Metropolitan Transport

🔗 **Website | </> Code**

- Features: This project mainly focused user authentication and form validation. I use custom react-hooks for form validation. I also implemented private-route process.
- Technology Used: HTML, CSS, Bootstrap, React, React-Router, Firebase
